

ICCICT2018
LIST of ACCEPTED PAPERS

Paper ID	Paper Title
1	Mutual Coupling Reduction in Patch Antenna Using Electromagnetic Band Gap (EBG) Structure for IoT Application
3	Design and Simulation of Four-Leg Based Three- Phase Four-Wire Shunt Active Power Filter
4	INFORMATION EXTRACTION FROM WIKIPEDIA ARTICLES USING DEEPLDIVE
5	HMAC and Group Key Combination based Accelerated Message Authentication for DSRC in VANET
7	Power Optimization In Wireless Sensor Networks
11	Optimize Cloud Computations using Edge Computing
15	Offline Signature Recognition System using Histogram of Oriented Gradients
17	Remote Monitoring of Water Level in Industrial Storage Tanks Using NB-IoT
19	HYDROBOT: An Underwater Surveillance Swimming Robot
20	Real Time Control Of Induction Motor Using Neural Network
21	Diagnosis Prognosis and Prevention of Breast Cancer Based on Present Scenario of Human Life
23	Comparative Study Of Different Image Reconstruction Methods
25	Implementation of MRI Gradient Generation System and Controller on Field Programmable Gate Array(FPGA)
35	Classification of voice disorders using i-Vector Analysis
36	Developing a multi-modal transport system by linkage of local public transport with commuter trains using software as a service(SaaS) architecture
46	Optimization of Physical Layer Performance of Wi-Max System with Low Density Parity Check Code
54	A Portable and Low-cost 12-Lead ECG device for sustainable remote healthcare
58	Detection of Paraphrases for Devanagari Languages Using Support Vector Machine
61	Numerical analysis of Atom-optics lithography for Aluminium deposition
62	Requirements Model for Adaptive Information System for Woman Health Monitoring System
65	Nepali News Classification using Naïve Bayes, Support Vector Machines and Neural Networks
73	A comparative analysis of feature extraction techniques for face recognition
76	Design and Optimization of Stepped Rectangular Antenna for RF Energy Harvesting
78	Design of Wideband Monopole Square microstrip patch antenna
79	Design of Wideband Printed Rectangular Monopole Patch Antenna With Band Notch
83	Compact Dual-band Patch Antenna using Triangular Complimentary Split Ring resonators for WiMax/WLAN.
90	Probabilistic Energy Efficient Routing Protocol for Wireless Sensor Networks
92	Design of an Intelligent system for Autism
98	A Comprehensive Integration of National Identity with Blockchain Technology
103	Scalable High Resolution Panorama Composition on Data Wall System

114	Comparison of improved converter topologies for high voltage gain
115	Enhancing Multimedia Compression and Transmission Technique to Aid Energy Efficient Wireless Multimedia Sensor Network
124	Identification of Nerve in Ultrasound Images Using U-net Architecture
126	Global Placement for Large-scale Mixed-size Designs VLSI Circuits using Plant Model
133	Design and Analysis of Multiband Defected ground plane MSA
134	Multiple Rectangular Slots Cut Rectangula Microstrip Antenna For Wide Band Response
135	Sectoral Patch Antenna Embedded with Arc Shape Slots and Slits For Circular Polarized Response
137	A Hybrid Part-of-Speech Tagger for Marathi Sentences
140	Comparison of Key Transform Domain Watermarking Methods Based on Performance Measures
146	Virtual Cells for Infrastructure-less MANETs
148	A Simplified Approach to Assist Motor Neuron Disease Patients to Communicate through Video Oculography
